

Vaccination Policies

North Carolina State Law mandates that all students entering college present a certificate of immunization, which documents that the student has received immunizations required by law. All new, transfer, and readmitted students must complete an immunization record and have it submitted to the Admissions Department prior to enrolling in classes. Please visit the N.C. Department of Health and Human Services to review N.C. Immunization Requirements for students attending college. Any exemptions will be identified by the Admission staff and notification sent to the student. We highly encourage all students to be vaccinated against COVID-19. If a student is not vaccinated, they must submit weekly testing results to the Dean of Students and remain masked while on campus or attending a campus event. See COVID-19 policy (this should link to policy)
